BOBBY BENZ

Price: \$220
globustoys.com.au

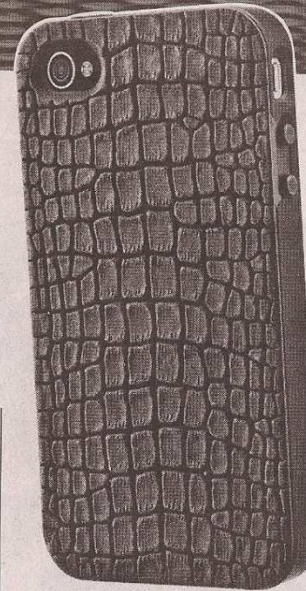

If you want your kid to scoot about the yard in style, this ride-on car modelled on the first Mercedes SLK might be the thing. Built in Germany, it has extra wide whisper wheels with treaded tyres and replica Mercedes-Benz rims. The tyres reduce the noise level. The quality car is UV protected so it won't fade in the Aussie sun. It's available from some toy stores — there's a list of retailers on the distributor's website.

SENNHEISER HD220 BY ADIDAS ORIGINALS

Price: \$99.95
sennheiser.com.au
adidas.com

Sennheiser and adidas have joined their considerable forces to introduce a co-branded pair of headphones designed for everyday use and offering good sound quality. The HD220 contain powerful neodymium magnets for powerful sounds along with comfortable and adjustable earcups and headband for extended wear. The closed supra-aural design also comes in handy to block outside noises which would normally interfere with the listening experience. Included with the HD220 headphones is a carry pouch for easy storage. It also comes with a two-year warranty.

SWITCHEASY IPHONE 4 REPTILE COVER

Price: \$39.95
switcheasy.com

Using a case with an iPhone 4 is a great way to protect the device but it's also a way to give it some character as well. This new SwitchEasy case can make it positively reptilian. Made from strong and durable polycarbonate, the Reptile cover has a distinct crocodile skin texture so it looks good and provides plenty of grip when holding the phone or slipping it in and out of your pocket. There are openings in the cover for the camera and for the volume switches, dock connector and headphone jack. Available in black, purple, brown and green.

ASUS LAMBORGHINI VX6 NETBOOK

Price: \$899
asus.com

You may not be able to afford the Lamborghini car but perhaps the Lamborghini netbook fits your budget. Asus has continued its partnership with the prestige car manufacturer and produced the desirable VX6, which features the style and crafting you'll find on the head-turning vehicles. And like the real Lamborghini, it's not just style and looks. Under the VX6 hood is a 1366 x 768 high-definition 12-inch screen and an Intel Atom D525 processor. There's also Bang & Olufsen ICEpower technology on board to ensure superior sound on the netbook, along with a matching Lamborghini mouse.
